

Philippines

Women, Business and the Law 2021 presents an index covering 190 economies and structured around the life cycle of a working woman. In total, 35 questions are scored across the eight indicators. Overall scores are then calculated by taking the average of each indicator, with 100 representing the highest possible score. Data refer to the laws and regulations that are applicable to the main business city (Quezon city). Different rules may apply in other jurisdictions so local legislation should be reviewed. Based on this approach, **Philippines scores 78.8 out of 100**. The overall score for Philippines is higher than the regional average observed across East Asia & Pacific (71.9). Within the East Asia & Pacific region, the maximum score observed is 91.3 (Taiwan, China).

Philippines - Scores for Women, Business and the Law 2021

Relative Strengths

When it comes to laws affecting women's decisions to work, laws affecting women's pay, and constraints on women's starting and running a business, Philippines gets a perfect score.

Areas for Improvement

However, when it comes to constraints on freedom of movement, constraints related to marriage, laws affecting women's work after having children, gender differences in property and inheritance, and laws affecting the size of a woman's pension, Philippines could consider reforms to improve legal equality for women.

For example, one of the lowest scores for Philippines is on the indicator related to constraints related to marriage (the WBL2021 Marriage Indicator). To improve on the Marriage Indicator, Philippines may wish to consider allowing women to obtain a divorce in the same way as a man, and giving women the same rights to remarry as men.

Recent Reforms

No reforms were observed during the past year.
