

Pakistan

Women, Business and the Law 2022 (WBL2022) presents an index covering 190 economies and structured around the life cycle of a working woman. In total, 35 questions are scored across eight indicators. Overall scores are then calculated by taking the average of each indicator, with 100 representing the highest possible score. Data refer to the laws and regulations that are applicable to the main business city (Karachi). Different rules may apply in other jurisdictions so local legislation should be reviewed. Based on this approach, **Pakistan scores 55.6 out of 100**. The overall score for Pakistan is lower than the regional average observed across South Asia (63.7). Within the South Asia region, the maximum score observed is 80.6 (Nepal).

Pakistan - Scores for Women, Business and the Law 2022

Relative Strengths

When it comes to laws affecting women's decisions to work, Pakistan gets a perfect score.

Areas for Improvement

However, when it comes to constraints on freedom of movement, laws affecting women's pay, constraints related to marriage, laws affecting women's work after having children, constraints on women starting and running a business, gender differences in property and inheritance, and laws affecting the size of a woman's pension, Pakistan could consider reforms to improve legal equality for women.

For example, one of the lowest scores for Pakistan is on the indicator measuring laws affecting women's work after having children (the WBL2022 Parenthood indicator). To improve on the Parenthood indicator, Pakistan may wish to consider making the government administer 100% of maternity leave benefits, making paid leave available to fathers, making paid parental leave available, and prohibiting the dismissal of pregnant workers.

Recent Reforms

During the past year (October 2nd, 2020 – October 1st, 2021), Pakistan lifted restrictions on women's ability to work at night.

Further data details for Pakistan are available at:
