Women, Business and the Law 2023 (WBL2023) presents an index covering 190 economies and structured around the life cycle of a working woman. In total, 35 questions are scored across eight indicators. Overall scores are then calculated by taking the average of each indicator, with 100 representing the highest possible score. Data refer to the laws and regulations that are applicable to the main business city (Island of Pohnpei (Palikir/Kolonia)). Different rules may apply in other jurisdictions so local legislation should be reviewed. Based on this approach, **Federated States of Micronesia scores 61.3 out of 100**. The overall score for Federated States of Micronesia is lower than the regional average observed across East Asia and the Pacific (72.6). Within the East Asia and the Pacific region, the maximum score observed is 91.9 (Hong Kong SAR, China).

Areas for Improvement

However, when it comes to laws affecting women's decisions to work, laws affecting women's pay, laws affecting women's work after having children, constraints on women starting and running a business, gender differences in property and inheritance, and laws affecting the size of a woman's pension, Federated States of Micronesia could consider reforms to improve legal equality for women.

For example, one of the lowest scores for Federated States of Micronesia is on the indicator measuring laws affecting women's work after having children (the WBL2023 Parenthood indicator). To improve on the Parenthood indicator, Federated States of Micronesia may wish to consider making paid leave of at least 14 weeks available to mothers, making the government administer 100% of maternity leave benefits, making paid leave available to fathers, making paid parental leave available, and prohibiting the dismissal of pregnant workers.
