

Poland

Women, Business and the Law 2023 (WBL2023) presents an index covering 190 economies and structured around the life cycle of a working woman. In total, 35 questions are scored across eight indicators. Overall scores are then calculated by taking the average of each indicator, with 100 representing the highest possible score. Data refer to the laws and regulations that are applicable to the main business city (Warsaw). Different rules may apply in other jurisdictions so local legislation should be reviewed. Based on this approach, **Poland scores 93.8 out of 100**. The overall score for Poland is lower than the regional average observed across OECD high-income economies (95.3). Within the OECD high-income region, there are 14 economies that score 100 out of 100.

Poland - Scores for Women, Business and the Law 2023

Relative Strengths

When it comes to constraints on freedom of movement, laws affecting women's decisions to work, laws affecting women's pay, constraints related to marriage, laws affecting women's work after having children, constraints on women starting and running a business, and gender differences in property and inheritance, Poland gets a perfect score.

Areas for Improvement

However, when it comes to laws affecting the size of a woman's pension, Poland could consider reforms to improve legal equality for women.

For example, one of the lowest scores for Poland is on the indicator measuring laws affecting the size of a woman's pension (the WBL2023 Pension indicator). To improve on the Pension indicator, Poland may wish to consider equalizing the ages at which men and women can retire with full pension benefits, and equalizing the mandatory retirement age for men and women.

Recent Reforms

No reforms were observed during the past year (October 2nd, 2021 – October 1st, 2022).
